International Conference on X-ray Lasers 2022

About ICXRL 2022

The ICXRL was established as a biannual event to promote the development of advanced extreme UV and X-ray sources, and their scientific applications in various fields. Joining ICXRL means experiencing the latest trends and shaping the future progress. Latest results involving state-of-the-art X-ray sources generated from intense lasers, plasmas or accelerated particles will be presented. Lecturers are expected to submit a paper for the Proceedings volume.

The program includes keynote lectures, invited lectures, technology focus talks and contributed short talks.

The Deadline for abstract submission for a contributed short talk or a poster is **August 11th, 2022**.
